Listen to the Silence II

Zhrnutie projektu: The context of the project is the experience that deaf and hearing (young) people are living in different (sub)cultures, hardly meeting with each other for common activities and communication with persons from the other group. Additionally to the division into different countries, languages and cultures in Europe there is also a division into the "World of Silence" and the "World of Sound" in all of our countries. We want to build bridges between these different realms through international youth exchanges with different kinds of non-verbal communication (body language, sign language, visual communication, etc.) and means of arts (e.g. photography, short films, acting, etc.). There will be an advanced planning visit and one youth exchange in Malta, a second youth exchange involving young adults from 20 - 30 years of age will be held in Germany. Participants will come from Malta, Germany, Czech Republic and Slovakia, all of the four groups will have 3 deaf and 3 hearing participants, sign language interpreters and a group leader.

The participants will get new experiences gained in the seminars and workshops as well as new contacts. They will learn to know new countries and new cultures. They will better understand what it means to live in the world of silence or the world of sound. Information and feedback of the project will be published in each of the countries. And the facebook group of this project will support the participants to stay in contact. There will be videos created which will be published on Youtube as well. Thanks to the motivation to continue our project from 2016 and to grow we'll again publish the outcomes by social media, internet and media in general. All of the partners will publish it in his country. With all those outcomes we want to attract further partners and participants to make this kind of project with its strong aim of inclusion a real motivation in expanding it as a model on international level.
